

CHOLINE CHLORIDE 60%

Product information:

- ❖ Choline chloride is one of the essential B complex vitamins for animal health. Its 60% concentration is the ideal formula for use in animal and poultry feed.

Benefits of the product:

- ❖ It effectively prevents fat accumulation and protects the liver and kidneys from denaturation, in addition to preventing rickets. It directly contributes to increased growth rates and weight gain in animals and poultry.
- ❖ It helps to strengthen and improve the efficiency of the immune system to resist diseases.
- ❖ It has a significant impact on improving the quality and quantity of egg and meat production.
