

## B TOX Antitox

### Product features:

- ❖ It neutralizes and binds mycotoxins (such as aflatoxin), preventing their absorption in the intestines of birds and animals.
- ❖ It contains substances that aid in liver cell regeneration and acts as a diuretic, helping the body effectively eliminate toxins and excess salts.
- ❖ It boosts immunity by reducing the burden on vital organs, improving the immune response to vaccinations and reducing mortality rates.
- ❖ It improves feed conversion ratios by stimulating appetite and improving digestion, which positively impacts weight gain and egg production.
- ❖ It is designed to neutralize harmful mycotoxins and protect the digestive health of livestock.

### indication:

- ❖ When symptoms of mycotoxicosis appear (such as lethargy, diarrhea, or liver enlargement).
- ❖ After completing a course of antibiotics to cleanse the body.
- ❖ Periodically (preventively) two or three days a week to maintain the health of the flock.
- ❖ When changing the type of feed or when its quality is in doubt.
